

Groupe REEL takes over CNIM Systèmes Industriels

CNIM Systèmes Industriels designs and produces large-scale complex mechanical systems and components for major high-tech industrials.

CNIM Systèmes Industriels relies on highly qualified engineers and on a world-class industrial tool, including large-scale and high-precision machining.

CNIM Systèmes Industriels is a French industrial equipment supplier and contractor with an international dimension and operates in three main areas: defence, nuclear power and industry.

With this acquisition, Groupe REEL strengthens itself in these areas by developing synergies with the other entities of the group, while preserving the identity and skills of CNIM Systèmes Industriels.

CNIM Systèmes Industriels suffered in the past from financial difficulties. Thanks to the support of the French State and of local authorities, to the positive outcome of new products development and now owing to the financial and operational support of Groupe REEL, CNIM Systèmes Industriels can step with confidence into a future full of potential.

Welcome to all the CNIM Systèmes Industriels teams in the REEL family.

CNIM

Systèmes Industriels

Based in France, **Groupe REEL** is an international, family-owned, independent industrial group, founded more than 75 years ago. It is specialized in complex lifting and handling systems and integrated solutions operating in harsh environments.

The group and its now **3,000 employees** provide systems and associated services in various markets: nuclear, defence, aluminium, offshore, aeronautics, hydro energy, marine energies and industry.
